**BLOCKBUSTER BIOLOGICS REVIEW** ISSUE 16

## ***Inter Partes* Reviews (IPRs) and Litigations**

## > **Quick statistics:**

- > The current institution rate for IPR challenges to patents that claim biologics is 37% (excludes IPRs that have settled or otherwise been terminated).
- > Of those IPRs instituted and that have gone to final written decision (FWD), 43% have resulted in the challenged claims being held unpatentable with 60% having mixed results.
- > On April 14, 2022, the Federal Circuit reversed the PTAB's decision holding that claims in Amgen's patent related to Neulasta are invalid as obvious.
